

Computer Assisted Instruction Your Key to Training and Utilization

Increase system utilization, productivity, and profits with Computer Assisted Instruction. Courses highlighting system tips and new enhancements are built directly into ERA-IGNITE and are available at no additional charge.

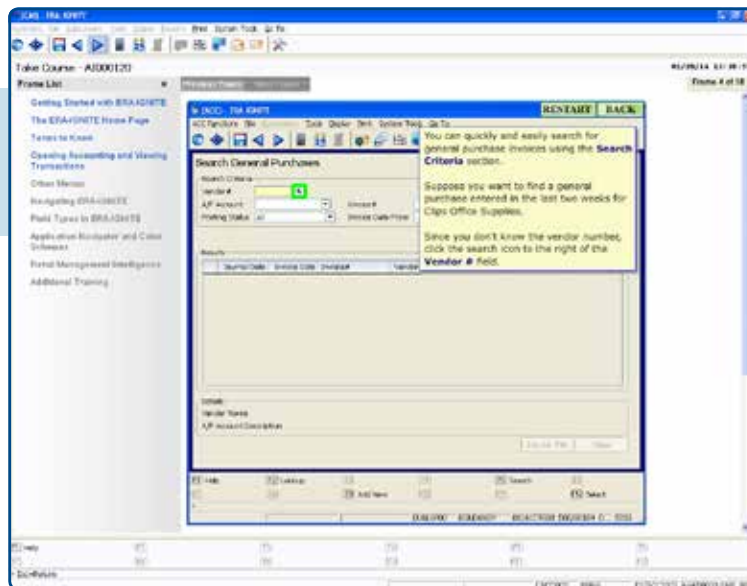

How It Works

1 The first time a user accesses an ERA-IGNITE application, they will be prompted to complete an overview course before receiving access.

2 Users will have a link directing them to the specific Computer Assisted Instruction class on the ERA-IGNITE Home Page.

3 Once the course is completed and the associated test is passed, the user can then access the related application in ERA-IGNITE.

For more information on training options, contact your account manager, call the Technical Assistance Center at 800.767.0080, or visit www.reyrey.com/training.
